

FETCHGIS MEASUREMENT TOOLS

Select the parcel you're interested in. Click on the monkey wrench icon in the black banner at the top of the website. Scroll down and click "Measurement Tools". Choose "Distance" for footages or "Area" for acreage.

Distance: click the line you are measuring. Once you have traced what you need, double click to finish.

Area: click on all corners of the parcel. End with the first corner you clicked on by double clicking.

Once you are finished, click "Clear All".
